

PROFESSIONAL SUMMARY

Computer Science postgraduate with strong fundamentals in web development, databases, and cloud technologies. Currently enhancing UI/UX design skills through Figma while proficient in Python, SQL, and web development. Passionate about creating user-centric digital solutions that balance technical feasibility with intuitive design. Seeking an entry-level role at Datalytix Solutions in either Design or Data Engineering domains.

PROJECTS & PRACTICAL EXPERIENCE

ProgressGrid 2026 – Complete Web Application Development

- **Built from scratch:** Designed and developed a fully functional productivity dashboard
- **Problem Solved:** Created offline functionality using localStorage so users don't need internet
- **Feature Implementation:** Added Excel/CSV export so users can save and analyze their data
- **Cross-platform:** Made it work on both desktop and mobile with responsive design
- **Deployment:** Published live at 199221007009.github.io/ProgressGrid2026
- **Technologies Used:** Pure JavaScript, HTML5, CSS3 (no frameworks)
- **Key Achievement:** Complete working application demonstrating full development cycle

IoT & EV Battery Technology Trainer – TNSkills/Naan Mudhalvan

- **Taught IoT and EV battery technologies** to college students as part of state skill development program
- **Designed technical** sessions on sensor networks, and battery performance metrics
- **Improved student comprehension** through practical examples and simplified explanations
- **Contributed to skill development initiative** preparing students for technology-driven careers
- **Built foundational knowledge** for students pursuing careers in emerging technology fields

UI/UX Design Practice (Self-Learning)

- **Practical learning:** Creating actual UI designs using Figma
- **Project-based:** Building wireframes and prototypes for mobile/web interfaces
- **Skill development:** Applying design principles to create user-friendly layouts

TECHNICAL SKILLS

Web Development (Hands-on Experience)

- **JavaScript:** localStorage, event handling, data processing
- **HTML5 & CSS3:** Responsive design, layouts, UI development
- **PWA Development:** Web App Manifest, offline functionality
- **Git & GitHub:** Version control, repository management

Cloud & Tools (Learning)

- AWS Cloud Practitioner (Certified)
- Snowflake: Data warehouse concepts (Badge 1)
- Figma: UI wireframing basics

EDUCATION

Master of Science in Computer Science
St. Joseph's College, Trichy **Apr 2023**
CGPA: 8.46 / 10

SOFT SKILLS

- Problem Solving
- Attention to Detail
- Quick Learning
- Project Management
- Technical Communication
- Team Collaboration

Programming Fundamentals

- Python Basics
- SQL Basics

Bachelor of Science in Computer Science
St. Joseph's College, Trichy **Jun 2021**
CGPA: 8.00 / 10

CERTIFICATIONS

- Snowflake Badge 1 – Completed
- AWS Cloud Practitioner – Completed
- TnSkill Certified

ACHIEVEMENTS & ACTIVITIES

- Built and deployed complete web application independently
- Consistent academic performance throughout education
- Active self-learner exploring new technologies

PROFESSIONAL ATTRIBUTES

- Ability to learn new tools quickly
- Clear communicator who can explain technical concepts
